Statement of Purpose

HL7 has as its mission the goal of providing reliable standards for the exchange, management and integration of data that support clinical patient care and the management, delivery and evaluation of healthcare services. HL7 encourages the creation of flexible, cost-effective approaches, standards, guidelines, methodologies, and related services for the interoperability of healthcare information systems. HL7 provides a forum for the effective and efficient communication between the constituents of the healthcare community as represented by its membership: an international community of healthcare organizations, vendors and developers of healthcare information systems, consultants and systems integrators, and related public and private healthcare service agencies.

PHUSE is an independent, not-for-profit organisation run by volunteers. A society with a membership exceeding 9,750, across more than 40 countries worldwide, PHUSE has become the industry voice to regulatory agencies and standards organisations such as the FDA, EMA & CDISC. We act as a global platform for the discussion of topics encompassing the work of data managers, biostatisticians, clinical data scientists and eClinical IT professionals.
