SMART App Launch Framework

SMART on FHIR provides reliable, secure authorization for a variety of app architectures through the use of the OAuth 2.0 standard. The Launch Framework supports the four uses cases defined for Phase 1 of the Argonaut Project.

Profile audience and scope

This profile is intended to be used by developers of apps that need to access FHIR resources by requesting access tokens from OAuth 2.0 compliant authorization servers.
Communicate with your doctor
Get answers to your medical questions from the comfort of your own home

Access your test results
No more waiting for a phone call or letter - view your results and your doctor's comments within days

Request prescription refills
Send a refill request for any of your refillable medications

Manage your appointments
Schedule your next appointment, or view details of your past and upcoming appointments

Patient-facing apps
Allow Access to Your Account

My Health Manager wants your permission to access the following information:

- Allergies
- Demographics
- Lab Results
- Vitals
- Care Team
- Health History
- Immunizations

Which patient do you want My Health Manager to be able to link to?

[Profile icons of Frank, Mom, Robby]

This app was not created by your healthcare organization. Approving this request allows third parties (this app, its developers, and its associates) access to your personal health information. Note that these third parties might not be obligated to protect your health information under the same privacy regulations as your healthcare providers and some apps might use data for advertising or other secondary purposes. Review this app’s Terms and Conditions to be sure that you are comfortable with the app’s use of your data before granting access.
