HL7 International
-State of the Union Address-

HL7 Standards
Past, Present and Future

Dr. Kai U. Heitmann M.D.
Managing Consultant, Heitmann Consulting and Services (The Netherlands)
Institute for Medical Statistics, Informatics und Epidemiology, University of Cologne (Germany)
Director International Affiliates - Board of Directors HL7 USA
Chair HL7 Germany

HL7 Plenary and Working Group Meeting Boca Raton, FL (USA), 2006-09-11
eHealth Concepts - Questions

• Applications?
  – Prioritize functionality

• Communication?
  – Facilitate electronic data exchange
  – Allow cross-sectoral communication

• Infrastructure?
  – “Highway” for healthcare information
  – Dealing with Transport & Security

• Plan and Vision?
  – Profit for Patients, Providers, Vendors
  – Preparing steps towards an “EHR”
What’s exciting about HL7 Version 3?

- Supports cross-sectoral Care Process Chains
- Reflects international contributions/standards
- Reflects expert knowledge collected over decades
Life Cycle of a Standard

Development Balloting Documentation

Adaption and Refinement

Implementing and using the standard

Marketing, Acceptance of the market

Unification, Formalization, Automation

HL7 Plenary and Working Group Meeting Boca Raton FL (USA), 2006-09-11
Global developments

• Lot of activities in eHealth and Medical Informatics
  – Other international and national Standards Developing Organizations
  – Governments

• Certain Confusion of the market
  – Harmonization needed
  – Clearly defined scope definitions

• Who is providing the Big Picture?
  – How does this fit together?
National / International Activities

• National Infrastructures / Projects
  – United Kingdom
  – Canada
  – The Netherlands
  – Croatia
  – Lithuania
  – United States
  – Finland
  – Japan
  – France
  – ...

• First HL7 Version 3 multi-national Projects
  – For example Dialysis/Nephrology Treatment Registry in 5 European Countries
National / International Activities

• First “serious” round of real implementations in production environments
  – Many advantages
  – Many challenges
  – Many problems (and partial solutions)
  – Lot of input for the next Standard’s Life Cycle

• Refinement of
  – The development / models
  – The methodology
  – The tooling
Work in „transition“

- Multi-national and multi-cultural input to the Version 3 development process over the last 10 years
- Important changes to HL7 under way
- Where is all this work done?
- Where and how is all this internationally coordinated?
HL7 Working Group Meetings

Boca Raton: ~ 450 registered participants
100 attendees of Sunday Meeting of the International Council
16 Affiliates / Countries
~ 80 non-US
HL7 International: thirtysomething countries
(Full affiliates and “observing” countries)
International HL7 Interoperability Conference

IHIC 2006
August 24.+25., 2006
Cologne (Germany)

~100 participants
...from 23 countries
Two day conference
...25 Presentations + 3 Tutorials
Noordwijkerhout
Köln
Auf der Infobahn
Essentials of German for Beginners
„Special“ Tour Through Old Town Cologne
Photographic Meeting Minutes Competition

HL7 Working Group Meeting
April 29 - May 4, 2007
in Cologne, Maritim & Intercontinental
eHealth: Different Approaches...

• ...between and within a country

• Standards development
  – Forster creativity: exploring different ways of doing “it” during development
  – Learn from experiences worldwide
  – Finally: come to an unambiguous, comprehensive and coherent set of standards

• Collaboration
“Scalable” Interoperability

- defined globally
- used locally

“No” Ambiguity

- one way of “doing it”
Thank you!
