PCPI Overview

Presented to HL7 CQI Workgroup
Kendra Hanley
October 6, 2015
History of the PCPI

• Convened by the AMA in 2000
• Leader in the measure development community
• Member organizations (specialties, states, boards)
• Developed 250+ measures in collaboration w/specialty societies
• Bringing various stakeholders together to develop measures
PCPI Governance 2000-2015

• Executive Committee set strategic direction
  – Designated seats for certain specialty societies
  – Limited voting rights for non-MD/DO members

• Advisory Committees on focused areas
  – Measure Development Methodology
  – Measure Implementation

• Measures voted and approved by member organizations
PCPI Governance Model: Why Change?

- Affordable Care Act
- Triple Aim
- Systemization & integration of care across settings
- Care delivered by teams
- Use of EHR/HIT
- New diagnostic/therapeutic modalities
- Shared decision-making
- Data driven improvement

System Factors

- Data comes from EHR/HIT systems, registries, large data systems & mobile devices
- Measures “fit for purpose”
- Different for different users
- When/how they want it
- How they receive/use it
- Process & culture change

Improvement & Measures

- AMA & PCPI pursue new strategic priorities
- Diversifying revenue sources
- Leadership through innovation

Business Model

- Consumerism
- New care models; patient centered care
- Lower costs
- Payment based on value
- Lower administrative burden to report performance

Stakeholder Needs
