How to find TSC information

Approved Projects

The TSC approved the following projects:

**Emergency Medical Services Constrained Information Model & Interoperability Specifications (EMS DIM & IS)** for the Clinical Interoperability Council (CIC) Work Group at TSC Tracker # 1697, Project Insight # 677. Co-sponsored by Patient Care, Emergency Care, and PHER work groups, the goal of the project is to develop a DMIM specific to emergency medical service in the pre-hospital setting based on the DAM approved in May 2010. The DMIM will be balloted as a DSTU. Subsequently, the project will develop interoperability specifications based on the DMIM, including, at least, a Patient Run Report from the EMS Agency to the ED and an Annual Report from the Agency to the national sponsor. These specifications will be balloted as DSTU, and implementation guides will be produced.

**International SDO Glossary (JIC Project)** for the Vocabulary Work Group and V3 Publishing Work Group, at TSC Tracker # 1679, Project Insight # 495. This project is co-sponsored by Patient Care, and the Joint Initiative Council. This is the HL7 representation of the JIC project that was formerly titled Health Informatics Harmonised Glossary, cosponsored by Patient Care Work Group of the Domain Experts Steering Division (DESD).

The intent of this document is to contribute actively to the development, and inclusion of HL7 glossary material to the international health informatics glossary work. This work intends to harmonize terms to improve understanding and provide a tool to make it easier to find terms and the documents in which they are used. This work can be considered a marketing tool for standards work and a publicly available indicator of harmonization, thereby increasing awareness of HL7 concepts outside the traditional HL7 community.

Deliverable: Procedure for ongoing management of terms and definitions within HL7 (Publishing) and their submission after appropriate review for quality, harmonization and clarification, for considerations within the health informatics SDO community (Vocabulary).

Approved Documents:

The TSC approved the following request to publish an Informative Document:

**HL7 Version 3 Implementation Guide: Drug Stability Reporting (eStability) R2, Release 2**, for RCRIM WG, at TSC Tracker # 1682, Project Insight # 275. Based on information
gathered during the FDA pilot of Release 1 the message and IG were revised and Release 2 was balloted as a DSTU last May.

Statistic of the Week:
Have you seen "MyHL7" on the HL7.org website? In just one short month since the new page was launched, it has seen over 27,000 visits. Perhaps you, too, will find it helpful, as it includes the ability to see upcoming conference calls and recent listserv messages on the "MyHL7" page, as well as a new interface for adding secondary e-mail addresses to your HL7 account. Log in to your HL7.org account and go to MyHL7 on the right side of the top navigation menu or go directly to http://www.hl7.org/myhl7/index.cfm.

How to find TSC information
The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: http://www.hl7.org/permalink/?TSCWiki. See the links below for instructions on how to view the list of projects and access the TSC Issue Tracker.

- TSC Tracker: link to http://gforge.hl7.org/gf/project/tsc/tracker/?action=TrackerItemBrowse&tracker_id=313
- Project Insight Searchable Database: link to http://www.hl7.org/permalink/?searchableProjectIndex
- Project List on GForge: link to http://gforge.hl7.org/gf/project/tsc/frs/?action=FrsReleaseBrowse&frs_package_id=98
- Project Insight: link to http://www.hl7.org/permalink/?ProjectInsight, (requires PMO-assigned log in credentials)
