Statistic of the Week:
How to find TSC information

**Approved Projects**

The TSC approved the following project, subject to the condition that no objections are raised in the following week:

**Electronic Nutrition Care Process Record System (ENCPRS) Functional Profile** for the Electronic Health Records Work Group (EHR) of the Structure and Semantic Design Steering Division (SSD SD) at TSC Tracker # 1727, Project Insight # 706. This project will create an Electronic Nutrition Care Process Record System (ENCPRS) Functional Profile based on the Electronic Health Record System Functional Model R1.1 (EHRS-FM). This project will be conducted as a joint work effort between HL7, the American Dietetic Association (ADA) and the International Confederation of Dietetic Associations (ICDA), where the ADA Nutrition Care Process - Standardized Language (NCP-SL) Committee creates the content and documents workflow relevant to the ENCPRS and the ICDA reviews the work and provides relevant input and/or revision. The workgroup will consist of subject matter experts from nutrition practice and nutrition software vendors. The intent is to develop a standard list of functions and criteria needed for full integration of the nutrition care process in the ENCPRS into the EHRS. This standardization will encourage the acquisition of EHR systems by nutrition health providers and promote information interoperability between nutrition and food systems and other areas of healthcare for a more complete patient care experience.

**Other Approvals:**

**Ballot Cycle Related Approvals**

In accordance with the GOM, the TSC approves ballot cycle documents, ballot levels, etc.

The TSC approved one new **DSTU Ballot**.

- Electronic Nutrition Care Process Record System (ENCPRS) Functional Profile (1st DSTU Ballot), Unique Ballot ID: CDAR2_IG_SDISP_R1_D1_2011JAN, for EHR – Project Insight ID 706, Unique Ballot ID: EHRS_ENCPFRSFP_R1_D1_2011JAN; first ballot of this material

**Other approvals:**

The TSC voted to recognize our "healthiest" work groups during the WGMs, starting with 2011May. Using our work group health metrics, the TSC will identify the healthiest work groups and provide them public recognition of their health during one of the morning general sessions. The metrics to
be considered for this should be limited to those metrics that are applied uniformly across all work
groups (i.e. excluding ballot participation).

**Statistic of the Week:**

Today we share a number of statistics related to the membership of HL7 and participation on its listservs.

Did you know: HL7 has approximately 2300 members - this total includes all individual members and all
individuals who are members via their organizational memberships.

However, there are far more people having interest in HL7 than ‘memberships’ describe. There are 12,868
unique email addresses subscribed to all the various HL7 listservs. Some individuals may have
subscribed multiple times with different email addresses to different lists. Some readers may only read
listserv messages to keep abreast of what is happening in a certain domain (dare I say “lurk”?). Of all
those on the listservs, only 738 unique email addresses have "sent" messages through the listserv in
calendar year 2010 to-date.

E-mail addresses unique to each (not on any other) steering division by Steering Division:

- DESD - 1618
- FTSD - 162
- SSDSD - 520
- TSSSD – 26

**How to find TSC information**

The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the
TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at:
http://www.hl7.org/permalink/?TSCWiki. See the links below for instructions on how to view the
list of projects and access the TSC Issue Tracker.
