The two DSTUs are slated to expire in January. We will be republishing them as part of a new project whose PSS was approved 2010-12-02 by SDWG, and which will be forwarded next to the SSD SD..

Other Approvals:

Specification of Infrastructure Version in PSS
The TSC discussed the guidance to be used in the FAQ section of the upcoming revision to the HL7 Project Scope Statement, regarding the specification of a RIM or other infrastructure version when a project is developing a V3 standard. The agreed recommendation is that the FAQ will read: “unless otherwise specified it will assume the current version of infrastructure (RIM, Datatypes and Vocabulary).”

The TSC also approved an updated version of their SWOT statement (Strengths, Weaknesses, Opportunities, and Threats), which recognizes Opportunities in linkage with Strategic Initiatives, establishing and driving Product Strategy, and improving Product Quality.
