HL7 Working Group Updates from the TSC for the week of February 13, 2012

Approved Projects
The TSC approved the following projects:

**Pedigree R1 Reaffirmation** for Clinical Genomics WG of Domain Experts Steering Division (DESD) at Project Insight # 852. Pedigree R1 was approved in 2007 and this project is about a reaffirmation ballot in May 2012, following ANSI rules.

**Gene Expression**, for Clinical Genomics WG of DESD, at Project Insight ID # 867. Gene Expression use cases, storyboards, and sample data will be used to understand the requirements and develop the standard accordingly. The major intent of this project is to create a V3 CMET to exchange Gene Expression data.

**Clinical Sequencing**, sponsored by Clinical Genomics, at Project Insight # 841. Clinical Sequencing use cases, storyboards, and sample data will be used to understand the requirements and develop the standard accordingly. The project proposes to first develop use cases and workflows (based on ONC/HHS Personalized Healthcare Use Case) to identify messaging needs. Second it will model the results and methods in the Clinical Genomics V3 CMET, which currently supports targeted clinical sequencing within a small set of genes. Additionally it will create vocabulary extension as necessary. (This needs to happen in parallel with product development.) Lastly, it intends to describe the results in V2 IG and GTR (Genetic Test Report – CDA-based).

Other Approvals
The TSC approved a request for withdrawal of prior balloted projects:

**HDF Phase III - HL7 Version 3 Development Framework, Release 1 (HL7 V3 HDF, R1)** at Project Insight # 299
