Approved Projects

The TSC approved the following projects:

Develop FHIR resources for Pharmacy, by Pharmacy WG of DESD at Project Insight 855 and TSC Tracker # 2287. This project will identify and define the initial set of “key” FHIR resources related to the domain of Pharmacy. These resources will be defined using the available FHIR tooling and in accordance with documented quality guidelines and balloted as part of the initial FHIR specification. Expected FHIR resources to be produced include:

- Prescription
- Dispense
- Administration
- Medication Statement

In addition, as the committee deems appropriate and time availability permits, it will define a small number of FHIR extensions relevant to domain content and expected to be necessary to support consistent early implementations.

Other Approvals

In addition, the TSC noted that for the Pharmacy FHIR Resources project and future projects, the FHIR Resources identified in FHIR project scope statements will be considered starting points for the naming and development of the FHIR Resources. Naming and content of the FHIR Resources will be subject to the FHIR governance process that will be established shortly by the TSC.

The TSC approved withdrawal of a project and ballot record for the Clinical Genomics WG of DESD:

HL7 Version 3 Domain Analysis Model: Clinical Genomics: Gene Expression, Release 1, at Project Insight # 333 was balloted 2010May as Informative 1. This DAM will no longer be balloted separately as an informative document. Project # 867 has replaced this project, with the -Omics DAM extension to include Gene Expression as part of Project # 705.

How to find TSC information

The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: http://www.hl7.org/permalink/?TSCWiki. See the links below for more information.
