Publication Approvals

The TSC approved the following Informative publication:
HL7 EHR-System Public Health Functional Profile Release 1 for Electronic Health Records WG of Structure and Semantic Design Steering Division (T3SD), at Project Insight # 704. Balloted in 2011May, as Informational Level 1 (Based on EHR System Functional Model and Standard, Release 1.1; U.S. Realm), This HL7 EHR-S Public Health Functional Profile (PHFP) identifies functional requirements and conformance criteria for public health-clinical information collection, management and exchanges that include specific public health programs (domains), e.g., vital records, early hearing detection and intervention (EHDI), cancer registries and others. This profile is a U.S. Realm Functional Profile that articulates the functional requirements needed to support data exchange among providers and public health stakeholders including, but not limited to states, local, and federal agencies. This project is supported by the Centers for Disease Control and Prevention/National Center for Health Statistics in collaboration with the Public Health Data Standards Consortium (PHDSC). Expert input was sought from local, state and federal public health agencies, healthcare organizations, public health professional associations, schools of public health, health IT vendor organizations, private sector and individuals interested in supporting development of the PHFP. Note: The term “Public Health” may be referred to as “Population Health” in certain realms.

The TSC approved the retraction of approval for the publication of a DSTU:
HL7 Version 3 Standard: Care Provision; Assessment Scales, Release 2, for Patient Care, at Project Insight # 664, as Patient Care has not finished the work to model and prepare DSTU publication for the Normative Edition.

Other Approvals

The TSC approved a change to its Decision Making Practices to allow matters of routine management that are following pre-defined approval processes such as project scope statements, ballot approvals and publication requests to be eligible to go directly to e-vote at the discretion of the TSC Chair.

How to find TSC information

The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: http://www.hl7.org/permalink/?TSCWiki. See the links below for more information.
