HL7 Working Group Updates from the TSC for the week of April 8th, 2013

Approved Publications
The TSC approved DSTU publication of:

HL7 Version 3 Standard: Care Provision; Assessment Scale, Release 2 for Patient Care WG at Project Insight # 664 for 24 months. Healthcare uses numerous tests, scales, and assessment instruments. These require a strict precision to naming, coding, and representing them in health care information technology. Examples include Apgar score, nutrition scales, Barthel index, Glasgow Coma Scale, among many others. The assessment scale R-MIM specifies the rules to exactly represent a scientifically valid and reliable instrument in HL7 CDA and v3 messages. It can be used in any message or CDA deploying the clinical statement.

How to find TSC information
The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: http://www.hl7.org/permalink/?TSCWiki. See the links below for instructions on how to view the list of projects and access the TSC Issue Tracker.

- TSC Tracker: link to http://gforge.hl7.org/gf/project/tsc/tracker/?action=TrackerItemBrowse&tracker_id=313
- Project Insight Searchable Database: link to http://www.hl7.org/permalink/?searchableProjectIndex
- Project List on GForge: link to http://gforge.hl7.org/gf/project/tsc/frs/?action=FrsReleaseBrowse&frs_package_id=98
- Project Insight: link to http://www.hl7.org/permalink/?ProjectInsight, (requires PMO-assigned log in credentials)
