Approved Projects

**Virtual Medical Record for Clinical Decision Support (vMR-CDS) XML Specification, Release 1 DSTU** at Project Insight # 1016. Sponsored by ITS of FTSD and cosponsored by CDS of SSD SD, the scope of this project is to update Release 1 of the Virtual Medical Record (vMR) for Clinical Decision Support (CDS) XML Specification and to ballot it as a DSTU. Provided below is an overview of the vMR and vMR XML specification. Of note, this specification was previously referred to as the vMR-CDS XML Implementation Guide.

**Event Publish & Subscribe Service Interface Specification** Project for SOA of FTSD cosponsored by CDS of SSD SD at Project Insight # 1051. This UV Realm project has an objective listed to ballot for comment only in 2014Jan. The proposed Event Publish and Subscribe Service is intended to complement existing SOA services and the SAIF Behavioral Framework (BF) for HL7. It will provide a Service Functional Model (SFM) for services, components and systems to subscribe to clinical events of interest and receive notice when new data are available. The service will support two common forms of filtering: topic-based and content-based.

**Unified Communication Service Interface Specification Project** for SOA of FTSD and cosponsored by CDS of SSD SD at Project Insight 1052. This UV Realm project has listed an objective to ballot for comment only in the 2014Jan cycle. The proposed Unified Communication Service is intended to complement existing SOA services and the SAIF Behavioral Framework (BF) for HL7. It will provide a Service Functional Model (SFM) for delivering alerts, recommendations, and other notifications using a variety of transport mechanisms to include email, SMS, VOIP or other communication channels. The service will provide for message routing and/or escalation to ensure that when the intended recipients are not available, appropriate surrogates can be notified and priority messages can be responded to in a timely manner.

Approved Publications

**HL7 Templates Registry Business Process Requirements Analysis, Release 1** at Project Insight # 829 for Templates of FTSD requests publication as an informative document and registration with ANSI as a Technical Report. Many groups are creating many types of templates independently and there is a need to discover what templates are available, how they are represented, what their approval state is and how they can be accessed and used. The Templates Registry Business Process Requirements Analysis enables the design of a Templates Registry that supports the registration and maintenance of template artifacts throughout their life cycle -- from initial proposal through to active use, including roles required for management and adoption.

Other Approvals

The TSC approved an updated Mission and Charter statement for the Technical and Support Services Steering Division.
**How to find TSC information**

The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: [http://www.hl7.org/permalink/?TSCWiki](http://www.hl7.org/permalink/?TSCWiki). See the links below for instructions on how to view the list of projects and access the TSC Issue Tracker.
