Approved Projects

Tuberculosis Domain Analysis Model, Release 2 at Project Insight # 371 has an updated scope statement as requested by the TSC to reflect ongoing work on the project. Its next milestone is projected for Informative ballot in 2014May.

Approved Publications

Informative Publication Requests

HL7 Version 3 Domain Analysis Model: Allergies and Intolerances, Release 1 at Project Insight # 881 for Patient Care WG requesting publication for 24 months. The Allergy and Intolerance Domain Analysis Model is broad, and is intended to unify a number of international models designed to deal with the documentation and interoperability of allergy and intolerance conditions. The use cases and models were developed with several goals in mind. The first goal was to provide the reader examples of the following concepts: • Documentation of a newly observed vs. reported allergy or intolerance • To establish that an allergy and intolerance should be treated as an adverse reaction until clearly differentiated (by test, or by clinical opinion) • To delineate the difference between severity and criticality and how to apply these concepts to an adverse reaction vs. a condition • To demonstrate the creation and maintenance of an allergy and intolerance list, as well as identify how to update a list after misattribution, or ensure that some statement of assessment is included on the list (no known allergies, unable to determine), and how to address an allergy entered in error. • To demonstrate the reconciliation of two different allergy and intolerance lists.

DSTU Publication Requests

HL7 Implementation Guide for CDA® Release 2: Trauma Registry Data Submission, Release 1 for CIC of DESD at Project Insight #1001 requesting publication for 12 months. This implementation guide supports the submission of trauma registry data from provider institutions to registry data collectors using the CDA standard. The clinical specifications were developed by the American College of Surgeons’ Committee on Trauma with support from eighteen other professional societies.

Other Approvals:

May Ballot Approval
The May ballot entries were approved by the TSC. See the full list at 2014MayTSC_Approval_List_LL.doc

Withdrawal Request
• HL7 Version 3 Standard: Transport Specification - Web Services Profile, Release 1 at Project Insight 301 for ITS WG of FTSD requests withdrawal. The underlying WS* standards have been finalized and include changes which require some fundamental changes to this specification therefore this specification is being withdrawn and a revision will be forthcoming.
• HL7 Version 3 Standard: Transport Specification - Web Services Profile, Release 2 at Project Insight 301 for ITS WG of FTSD requests withdrawal. There has been no resources put forward to complete this project for more than five years so this is interpreted as not being of material interest at this time. The materials will be retained should this topic resurface as a matter of interest.

Announcements:
Congratulations to the Patient Administration WG of SSD SD for their normative publications requested for HL7 Version 3 Standard: Patient Administration; Patient Encounter, Release 1 and the reaffirmation of HL7 Version 3 Standard: Patient Administration; Personnel Management, Release 1

Congratulations to CDS WG of SSD SD on normative publication requested for HL7 Version 3 Implementation Guide: URL-Based Implementations of the Context-Aware Information Retrieval (Infobutton) Domain, Release 4 at Project Insight #876, and HL7 Version 3 Standard: Context-Aware Knowledge Retrieval Application (Infobutton); Knowledge Request, Release 2 at Project Insight #875!

**How to find TSC information**

The TSC wiki site houses its minutes, process documents, templates, links to the ArB wiki and the TSC Issue Tracker, a list of current projects, and more. You can access the TSC wiki at: [http://www.hl7.org/permalink/?TSCWiki](http://www.hl7.org/permalink/?TSCWiki). See the links below for instructions on how to view the list of projects and access the TSC Issue Tracker.
