HL7 Working Group Updates from the TSC for the weeks of March 31 and April 7, 2014

Approved Projects

CDS Knowledge Sharing Implementation Guide for CDS WG Of SSD SD cosponsored by CQI of DESD at Project Insight 931. The scope of this project is to refactor the CDS Knowledge Artifact IG and associated HeD Schemas to ensure a clean separation such that the expression language core components could be referenced independently. In addition, minor changes required to support the QDM/HQMF and HeD Harmonization efforts will be included, specifically the need to introduce a generic extension mechanism into the base expression type to allow expression logic to be decorated with application-specific information without needing to change the base expression schema.

V2.x Tutorial Workshop Development for Education WG cosponsored by Tooling WG of T3SD at Project Insight 1060 and TSC Tracker 3133 to develop a set of workshops style materials for v2.x training. The current materials are knowledge-download type. Need to develop new courses which are a mix of presentations, technical webinars, and hands-on workshops.

Approved Publications

Informative Publication Requests

• HL7 Domain Analysis Model: Harmonization of Health Quality Artifact Reasoning and Expression Logic for CDS WG of SSD SD at Project Insight 1049. This document seeks to define the common concepts and semantics involved in modeling reasoning within the various aspects of the health quality domain, with the goal of providing a common conceptual foundation that other specifications can use whenever the need to express and communicate expression logic arises.
