Approved Projects

The TSC approved the following projects:

Co-Chair Handbook Maintenance project for Process Improvement Committee (PIC) of Technical and Support Services Design Steering Division (T3SD), see TSC Tracker # 1627 or Project Insight # 590. This project is for the bi-annual maintenance of the co-chair handbook. It will update the Co-Chairs handbook based on input received from members and co-chairs and to reflect updated processes at HL7.

A new scope statement for the **TSC Innovations Project** was approved "in-committee" by the TSC and has been circulated to the Co-Chairs and International Council chairs for comment. See TSC Tracker # 1585 or Project Insight # 701. The scope of this project is to provide a clear process for soliciting innovative ideas and approaches relative to the design, development, publication, and implementation of HL7 standards. The Innovations process will be defined and managed by the TSC with input from the HL7 Board. The innovations project will monitor the health of HL7's innovation management - this may be done by looking at practice in comparable organizations, feedback from members and stakeholders, and in other ways.
