Turnkey clinical data provisioning solution and development platform for modern web and mobile interoperable healthcare applications.
We are a healthcare IT company with a unique expertise in development of sophisticated healthcare information systems using modern cloud technologies.

Health Samurai (HS) was one of the first companies that recognized a potential of the FHIR standard in 2012 and since has been an active contributor to the FHIR work group.

Pavel Smirnov, CEO
Seasoned technology leader with over ten years of experience managing healthcare IT projects.

Nikolai Ryzhikov, Ph.D., CTO
Exceptional software architect, Nikolai is an engineering visionary with drive for delivering great bottom line results.

Hermosa Beach, 2017
Aidbox supports an ecosystem of multiple connected healthcare applications and devices.

Legacy healthcare IT

- EHR
- LIS
- RIS

Next generation healthcare IT

- Mobile Apps
- Web Apps
- Medical Devices
We use FHIR in real applications since 2012.
Aidbox as a back-end. Decrease time to market for new future proof health IT products.
Aidbox as a clinical data repository.
Powerful data analytics tools.
Aidbox as an API facade. SMART on FHIR applications run on your platform.
Storage for FHIR resources that uses PostgreSQL

- Open source*
- Built in collaboration with PostgreSQL development team
- Transactional integrity and flexible search/SQL queries
Core features

- FHIR API (STU3)
- Policy based access control
- OAuth 2.0 (or use external)
- HL7 v.2 to FHIR connector
- Terminology server
- Monitoring and audit tools
Aidbox infrastructure is fully automated and dockerized

- Cloud
- HIPAA technical safeguards
- High availability
• Validation with JSON schemas and their translation to FHIR profiles
• Swagger API (GraphQL is coming)
• Reactive interfaces: secure chat and reactive search via long polling API
• FHIR-like API for generic JSON and binary documents
• FHIRbase stored procedures as REST API end points for complex BI
What is coming?

- New release of the FHIRbase in C language for performance
- Multiple FHIR versions support and tools for migration
- Full transaction logs with ability to re-play them
- Interactive tutorials for decreasing barriers to entry
Demo time!

Thank you!
