Report Outs from Day 1

Clinical Track

Russ Leftwich, MD, Sr. Clinical Advisor for Interoperability, InterSystems

Stan Huff, MD, Chief Medical Informatics Officer, Intermountain Healthcare

Value-Based Care Track

Jocelyn Keegan, Senior Consultant, Point-of-Care Partners

Biopharma/Clinical Research Track

Wayne Kubick, CTO, HL7

Biopharma/Clinical Research

- Many new, first-time participants
- Discussion of how to move from Proof of Concept to production use
 - Build awareness among sites and investigators, as well as broader research community
 - Increase comfort level for adapting to change
 - Encouraging innovation at the site level
 - Clarify approaches and policies for managing consent, security, access, data sharing
- Discussed need for an Endpoints Directory (so researchers can find FHIR servers with relevant data and governance structure)
- Discussed role of 3rd party Apps such as Patient Aggregators as a conduit to a full patient record
- Discussed how to maintain anonymity and privacy
- Other topics:
 - Potential of FHIR Bulk Data Access Approach as a near-term, intermediate approach to using EHR data for research
 - Use of blockchain and consent management.
