8 May 2023

HL7 International

Collaboration moves at the speed of trust.

HL7 International

SDO Collaboration

The ANSI-accredited standards development organizations partner with HL7 to support healthcare and research data interoperability. We are aided by other organizations that promote implementation, education, safety, coordination, and play key advisory roles.

HL7 could not aspire to a future of seamless interoperability without their participation.

Government Agency Collaboration

In the US, the government agencies provide much more than regulatory oversight.

We partner on standards development and implementation.

GAs provide grants and extramural funding.

GAs develop invaluable guidance.

GAs partner on education and training.

GAs share insights on standards evolution.

GAs promote standards adoption and integration.

We rely upon them for technical expertise and longitudinal experience.

Professional Society Collaboration

As the members of professional societies are increasingly voicing alarm over escalating clinical burden, they turn to HL7 for solutions to many challenges.

Traditionally, we have relied upon so many of these individuals for domain expertise, for clinical workflow, and for data element definitions.

Now, we witnessing an essential collaboration for standards implementation, for clinical decision support, for research prioritization, and for achieving the quadruple aim.

HL7 International

Trade Organization Collaboration

The growth of technology developers has paralleled a growth in scientific advancement and integration of technologies into the practice of medicine and the creation of innovative solutions for healthcare and disease prevention.

Today, these organization provide unique forums for collaboration, for education, and for innovation.

We rely upon them for innovation and for promoting interoperable solutionso.

HL7 International

Technology Vendor Collaboration

To the layman, the technology vendors are the first to mind when advances in healthcare IT are first envisioned.

They are more than the creators of electronic health record innovation.
They are both the creators and the adopters of standards.

They build the bridges to the payer organizations, to the clinical community, to the research innovators, and to the patients themselves.

Unique in our collaboration, they stoke the engines and apply the brakes.
They are our greatest admirers and most strident detractors.

Consultancy Collaboration

From very large global organizations to boutique firms that specialize in standards, these are just a few of the many consultancies that support HL7 through

HL7 International

Non-government Organization (NGO) Collaboration

One of the most difficult to define categories of organizations with which we collaborate are NGOs.

The NGOs are more than non-profits. They provide critical support. They provide policy and help to define the ecosystem. They influence decision makers with their ability to define solutions to challenging problems. They oversee very specific domains and very large communities. And, yes, they help to fund our vision.

These are but a very few examples of our collaborators.

MITRE

KLAS RESEARCH

World Health Organization

PAHO Pan American Health Organization

THE PEW CHARITABLE TRUSTS

Robert Wood Johnson Foundation

HL7 International

Cloud Vendor Collaboration

In August 2018 in Washington, the six largest cloud vendors announced their collaboration for implementation of the FHIR API.

Less than two years later, they each announced a collaborative initiative for importing large cohorts of data with Bulk FHIR.

Patient Advocacy Collaboration

It is probably accurate to sum up our reason for being by saying that we do it all for our patients.

The care of patients, the prevention of disease, and the striving for wellness are at the very heart of our mission. Our singular focus is to provide information when and where it's needed.

Patient advocates often do not provide the technology. But their commitment to our fundamental processes are invaluable.

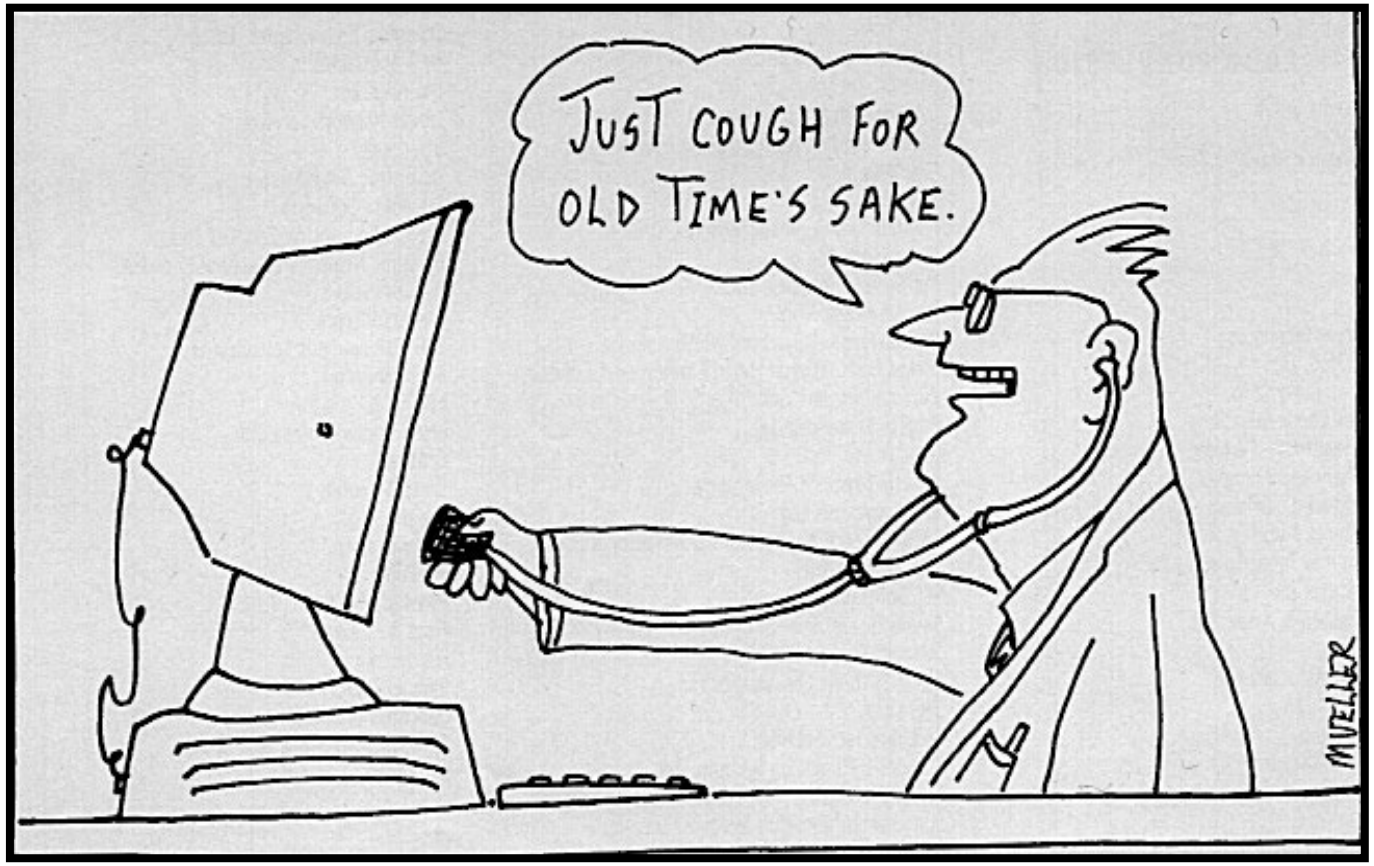
Their reach is global. Their goals know no national borders.

There are hundred of organizations and thousands of individuals who provide insights for which there is no measure.

HL7 could not succeed without them.

HL7 International

Thanks



Collaboration moves
at the speed of trust.

HL7 International Executive ELT SID Brief (DK&VN)

MAY 08, 2023

KEY ACTIVITIES IN PERIOD

- Participation in VIVE/HIMSS/PAHO CONNECTATHON
- Organizing WGM+
- Security Event being organized (Aug.2023)
- Synthetic Data Event RFP Out
- Foundry EOI Out
- Quality Accelerator moving forward with initial stakeholders
- Planning for DevDays+ Board Retreat+ Medinfo
- Sandbox Transfer to HL7 Assets
- Education Credentialing Answers to RFP received

ISSUES, RISKS & CONCERNS

! Delay in Signing Agreement with WHO
! Technical Problems transferring Sandbox to HL7 Assets
! Lack of Budget for Foundry, or no offers
! Device Accelerator not ready to start
! Too much speakers for New Events, or too few

KEY ACTIVITIES FOR NEXT PERIOD

➔ WGM+ , DevDays, MedInfo
➔ Security Event Organization (weekly meeting)
➔ Foundry Vendor Selection
➔ Synthetic Data Event Selection
➔ Quality Accelerator Activities Start
➔ Sandbox Transfer Completed (End of May 2023)
➔ Education Credentialing Vendor Selected
➔ First face-to-face course in Africa (Kenya)
➔ Advancing in Gemini Projects w/IHE (Lab, Imaging, Pharmacy)
➔ Education Partnering: First organization
➔ Regional Partnership with RACSEL (IDB)

Board Discussions and Decisions Requested

! Foundry Funding
  - Core funding from Da Vinci & FAST ($10k/mo)
  - AWS Hosting credits
  - In-kind support

SDOH Clinical Care

2.0.0

HL7 International • Patient Care WG

United States of America

November 2022

Social Determinants of Health (SDOH) are increasingly being recognized as essential factors that influence healthcare outcomes. This HL7 Implementation Guide (IG) defines how to exchange SDOH content defined by the Gravity Project using the HL7 FHIR standard. It defines how to represent coded content used to support the following care activities: screening, clinical assessment/diagnosis, goal setting, and the planning and performing of interventions. This IG addresses the need to gather SDOH inf...(more)

DA VINCI CHAMPIONS: 2022

Champion attributes

- Industry above self
- Passion for making the healthcare system work better
- Supporting others
- Promoting change

2022 CHAMPION: Susan Bellile

"The Da Vinci project plays a critical role in accelerating the adoption of FHIR by bringing together representatives of payers, providers and vendors to collaborate on approaches to specific use cases. All parties, especially patients, benefit from more consistent and truly interoperable exchanges of healthcare data."

Susan Bellile
Principal, Clinical Solutions
Availity

2022 CHAMPION: Caitlyn Campi

"The HL7 Da Vinci Project is important as it provides health plans and other stakeholders with practical implementation guidance for using FHIR to achieve interoperability through compliance, provider, and digital channels. This guidance has allowed us as a health plan to support value-based care, foster industry collaboration with a multitude of stakeholders, and ultimately has led us to improved healthcare outcomes with a new experience for our members through interoperability."

Caitlyn Campi
Digital Interoperability Product Owner
Florida Blue

2022 CHAMPION: Kyle Johnsen

“The potential impact automating prior authorization would have on so many lives keeps me working on it over the years, and Da Vinci bringing together people with vastly different backgrounds but the same shared goal keeps me energized to build a strong foundation.”

Kyle Johnsen
Software Developer
Epic

2022 CHAMPION: Tom Loomis

"Da Vinci is executing on its goal of bringing payers and providers together to address industry interoperability challenges. Having spent a large part of my career on the provider side, not working on the payer side, solutions and challenges are not always obvious. Fostering conversations that have both sides present is extremely important."

Tom Loomis
Architecture Senior Advisor – Interoperability Focus
Evernorth

2022 CHAMPION: Michael Marchant

"The Da Vinci Project is a critical industry initiative as it is addressing one of the largest administrative costs in healthcare – the exchange of information between payers and providers. That cost is not only dollars, but significantly impacts the timeliness and therefore quality of the care patients / members receive – which adds a multitude of costs – that include the health and wellbeing of everyone involved."

Michael B. Marchant
Executive Director - Interoperability
UC Davis Health

2022 CHAMPION: Ezequiel Morales

"'If you want to go fast, go alone, if you want to go far, go together'.

Da Vinci is a forum that will take us far, together."

EZ Morales
Architecture Senior Advisor, Interoperability
Evernorth Health Services

2022 CHAMPION: Snapper Ploen

"The HL7® Da Vinci Project has been a sterling example of industry collaboration with the goal of improving patient care delivery as well as outcomes.

As a member of the MCG Health team partnering with payers, providers, and government stakeholders, I feel like Da Vinci is leading historical transformations in healthcare technology which are already producing measurable benefits to patients."

Snapper Ploen
Associate Director of Marketing,
Content Creation & Distribution
MCG

2022 CHAMPION: Matt Schuller

"As a leader in health IT and industry standards, it was only natural for the BCBS System to step in on the early formation of this thought-leading interoperability initiative. As stewards of Blue System data, BCBSA and Blue Cross and Blue Shield companies have long been champions for health data exchange, and we believe the next generation of leadership in health care data interoperability will require significant coordination, collaboration, perseverance, innovation, and the willingness to break down long-standing barriers."

Matt Schuller, MS, RHIA
Health IT and Industry Standards
BCBSA Interoperability Solutions

HL7 FHIR Connectathon

3 Days | Virtual Event

An HL7 Fast Healthcare Interoperability Resources (FHIR®) Connectathon features hands-on FHIR development and testing. This is a chance to get your hands dirty and learn by helping evolve the FHIR specification!

Whether the format is virtual or in-person, implementers and developers can gain experience developing FHIR-based solutions and exchange data with other FHIR interfaces.

Participants select one of several tracks based on level of readiness and area of interest, and can engage in hands-on, heads down development and testing. There is an opportunity to work directly with other FHIR developers and senior members of the FHIR standards development team, and participants are expected to write some software intended to demonstrate FHIR connectivity.

EVENT DATES

January 13-15, 2021

HL7 FHIR Intermediate

6 Weeks | Self-paced

This intermediate level, 6-week course for developers provides an overview on how to program FHIR clients and servers. It also features an introduction to the most relevant implementation guides in the healthcare IT market: Argonaut, IPS, SMART on FHIR and CDS Hooks. Hands-on exercises are included on how to implement HL7 FHIR, using widespread open source libraries for C#, Java and JavaScript.

Participants will learn:

- How to navigate the Argonaut and IPS implementation guides
- What is involved in programming a FHIR Client using Java, C# and JavaScript
- How to create a FHIR façade to integrate a legacy application
- How to use SMART on FHIR to integrate apps with EHRs
- How to use CDS Hooks to integrate clinical decision support to an app
- Fercam

Prior experience with FHIR is required. Background in software development using Java, C# or JavaScript is required to complete the course assignments. Completing the HL7 FHIR Fundamentals course is highly recommended.

COURSE DATES

February 18–April 1, 2021
June 3–July 15, 2021
September 16–October 28, 2021

INSTRUCTOR

Diego Kaminker: Affiliate Director, HL7; Creator & Educator, HL7 Fundamentals, FHIR Fundamentals and FHIR Intermediate; Member, HL7 Argentina

Fernando Campos, FHL7: Chair, HL7 Argentina; Creator & Educator, HL7 Fundamentals, FHIR Fundamentals and FHIR Intermediate; Software Engineering Department Chief, Hospital Italiano de Buenos Aires; Author

*Classes that are recorded will be available at HL7 On Demand

Good News!

HL7 International
® Health Level Seven and HL7 are registered trademarks of Health Level Seven International, registered with the United States Patent and Trademark Office.

CHALLENGES

- Multiple EHR Systems
- Patient consent given multiple times (on paper)
- Wrong insurance charged
- Patient emails invoices
- Sometimes Patient pays and is reimbursed

HL7 International

® Health Level Seven and HL7 are registered trademarks of Health Level Seven International, registered with the United States Patent and Trademark Office.

Prior Authorization

- Critical Procedures Delayed or Cancelled
- Example: Physical Therapy
  - Payer asks for detailed information
  - Providers frustrated with the barrage of questions
    - Decision: Life Care Planner to assess long-term care and vocational needs in 60 days. Permission for outpatient rehab given after 5 months
