Hi Russ,

Sorry it took me so long to get back to you on this. The following copyright statement should be included in the IG probably on the Acknowledgments Page:

This material contains content from SNODENT® Copyright American Dental Association (ADA). All rights reserved. SNODENT is a registered trademark of the ADA. <http://www.ada.org/en/member-center/member-benefits/practice-resources/dental-informatics/snodent/licensing-snodent>

The ADA also grants permission to HL7 to enumerate the SNODENT codes and descriptions for the concepts that are needed for the periodontal attachment. Please let me know if you have any questions. Thanks,

Jean Petersen Narcisi narcisij@ada.org

Cool – thanks for chasing this Jean.

The insight you've provided below will help me to prep the revised Harmonization Proposal in the meantime.

Hi Russ,

I'm finding out what we need to do for the copyright statement and will let you know. I'm also having our Statement of Understanding (SOU) with HL7 reviewed because some of this may be covered already in

the agreement. I agree that the SCT identifiers should be used. There will not be a problem with the enumeration of the codes and descriptions in the IG but I will find out how that can be formally communicated to HL7 in case it is not included in the SOU.

Thanks,

Jean Petersen Narcisi narcisij@ada.org

Subject: Periodontal Harmonization follow-up

Hey Jean,

I got a chance to connect with Ted Klein on Friday regarding our Harmonization proposal, and based on his discussions and recommendations from Patrick Cannady on our call on Thursday, here's what I think we need to do:

- 1) Adjust our proposal to the use the SNOMED ConceptIDs (that are also part of SNODENT) as the identifiers in our value sets. Per Patrick, the shortened identifiers you provided are more "internal" identifiers that systems are less likely to use – does that sound right?
- 2) Ted recommends establishing the value sets as "International" rather than "US Realm" – I think that would make sense given the nature of the value sets we have – human anatomy doesn't change in different countries.
- 3) Obtain guidance from the ADA for where SNODENT copyright information needs to be in the guide, and relative to the value sets:
 - a. Do we need to include copyright information in the Code System description (I believe this is what will appear in Rosetree for v3 terminologies, and is separate from the HL7 OID registry)?
 - b. Do we need to include copyright information in the Value Set descriptions (these will appear at the back of the IG – see page 118 in the attached)
- 4) Obtain guidance from the ADA on enumeration of the Value Sets in the IG – can we enumerate both the Codes and the Descriptions in the IG?

Is there some formal way you can have the ADA's position on #3, and #4 documented? I'm not sure how these types of agreements between HL7 and the ADA might be established, so let me know how we need to proceed.

- Russ
